SUMMARY

Full-stack software engineer focused on building scalable SaaS products, modern web applications, backend systems, and mobile experiences using React, Next.js, TypeScript, Flutter, Python, and cloud technologies. Experienced in building and deploying production-ready applications with APIs, authentication systems, payment integrations, databases, and responsive user interfaces. Strong interest in product engineering, backend systems, and mobile application development.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Flutter, Dart, Tailwind CSS

Backend & Databases: Supabase, PostgreSQL, SQL, REST APIs

Programming Languages: Python, Java, C++, TypeScript

Tools & Cloud: Git, Vercel, AWS, Stripe, Paystack, Resend

Data & Machine Learning: NumPy, Matplotlib, Machine Learning

Networking: Cisco Networking, Routing, Switching

WORK EXPERIENCE

Full-Stack Engineering Intern — Noccemedia Agency, Hamburg

Jan 2023 - Present

- Worked on full-stack web development tasks and modern frontend/backend workflows.
- Collaborated on responsive web interfaces and software solutions.
- Contributed to application features, integrations, and engineering workflows.

ENGINEERING PROJECTS

Rikly — Full-Stack SaaS Platform

Mar 2026 -present

- Built and deployed a production SaaS platform using Next.js, React, TypeScript, Supabase, Stripe, Paystack, Resend, and Vercel.
- Implemented authentication workflows, payment integrations, responsive dashboards, and transactional email systems.
- Managed deployment and production hosting workflows.

Stock Market App

- Built a Flutter mobile application integrating stock market APIs and financial news APIs.
- Implemented responsive mobile interfaces and asynchronous API data handling

Monte Carlo Simulation

- Implemented mathematical probability simulation models using Python and NumPy.
- Visualized outcomes using Matplotlib and Tableau.

Student Management System

- Built a C++ student management system with add, search, edit, and display functionality.
- Upgraded the project with a GUI to improve usability and user experience.

EDUCATION

Sept 2023- Sept 2026

Bachelor of Science in Software Engineering

University of Europe for applied science, Potsdam

- Relevant coursework in Programming, Design, software engineering and Project Management.

ADDITIONAL INFORMATION

- **Languages:** English(Fluent), German(B1)
- **Certifications:** Meta Back-End Developer, AWS Academy Cloud Foundations
